

National Seating: You're in the Driver's Seat

YOUR SOLUTION TO ERGONOMIC SEATING.

National Seating is a pioneer in the North American Class 8 seating business. We pride ourselves on inventing the first air suspension seat for the trucking industry, offering 2.5 million seat combinations, and quickly expanding to become a leading supplier of static, passenger, bus, and rail seats.

- Air Suspension Seats
- Static Seats
- Bus Seats
- Railcar Seats
- Round Convex Mirrors
- Rectangle Mirrors
- Motorized Mirrors
- Heated Mirrors

“We’re successful because we aren’t afraid to take chances with modern processes, or continue with the tried and true. We currently engage in robotic welding, automated valve assembly, automated fabric cutting, and handcrafted cut and sew operations.”

Our innovative processes and focus on aftermarket solutions lends us a reputation for ergonomic comfort and, above all, options. National Seating end-users have access to a wide selection of features like lumbar support, cushion and back bolsters, and leg and thigh supports. There are also significant options when it comes to pricing. Whether our customers are independent owner-operators, fleet managers, or original equipment manufacturers, we have a seat that meets their needs and pricing requirements.
